
Rampaging Chariots

2024

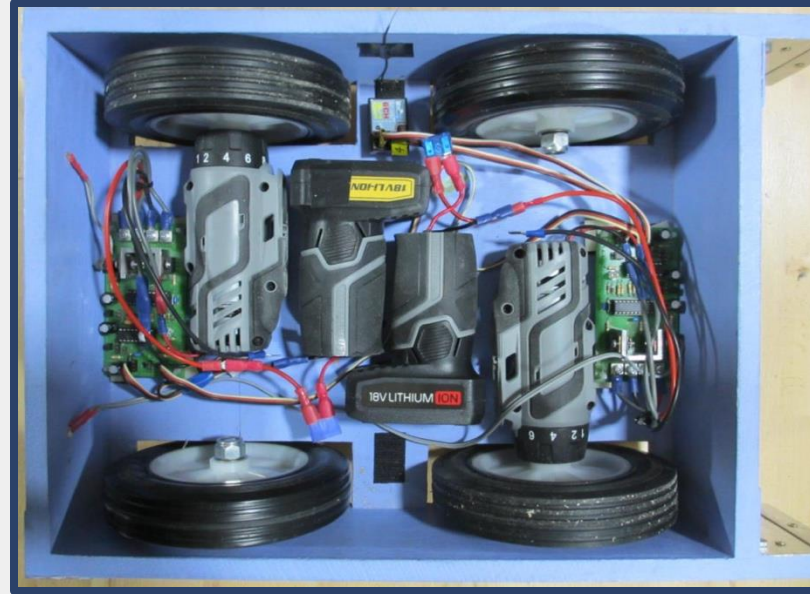

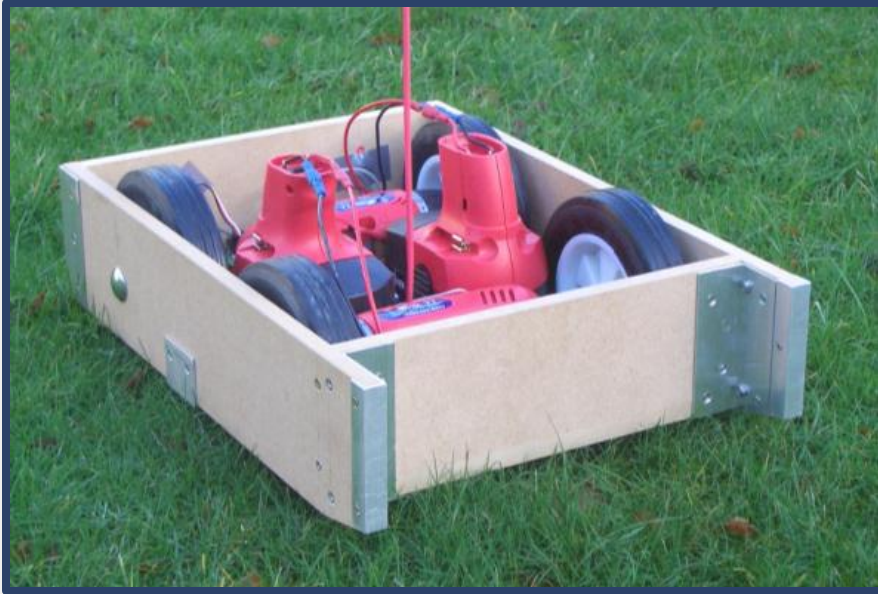

Who are we?

Leonardo is a world leader in the aerospace, defense and security sector, with a wide range of products.

What is a Rampaging Chariot?

A Rampaging Chariot is a powerful radio controlled robot.

- Originally inspired from Robot Wars.
- The standard Chariot kit is devised of 330 parts.
- Built and developed by schools and youth groups.

History

Rampaging Chariots was initially developed by Peter Bennett, an ex Robot Wars champion, in 2005.

As a means to promote STEM activities within schools.

History

He built the robot 'Typhoon' along with five other engineers from Leonardo's Airborne & Space Systems Division.

Which went on to win 5 Robot Wars titles, 2 Techno Games titles and the world Olympics silver medal in 2005.

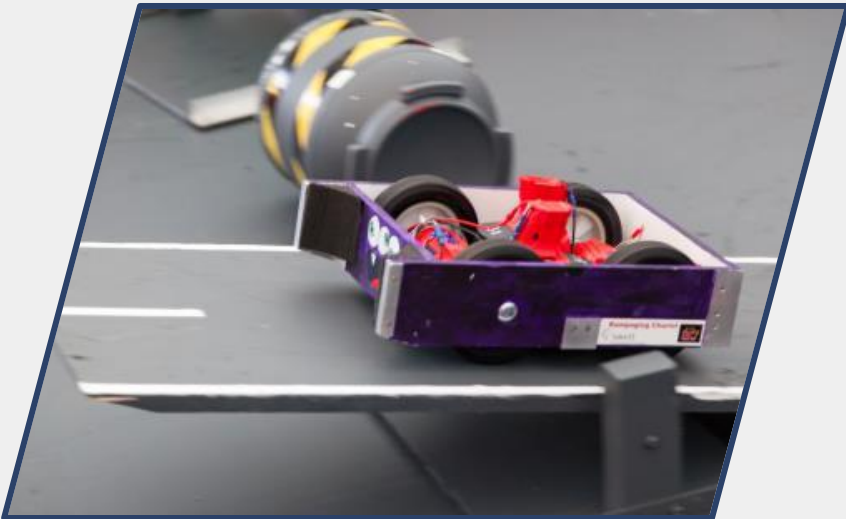

The Competition

Build your chariot.

Compete against other schools.

The fastest and strongest wins.

Held at our Luton site.

Consists of 4 events.

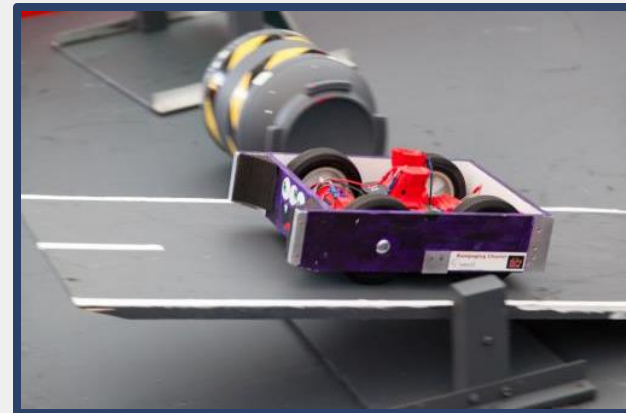

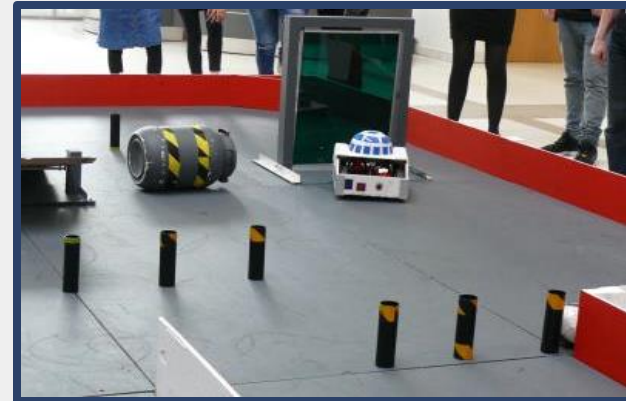

Awards for each event and more...

Obstacle Course

Two teams compete against each other to be the fastest around the course.

The course consist of:

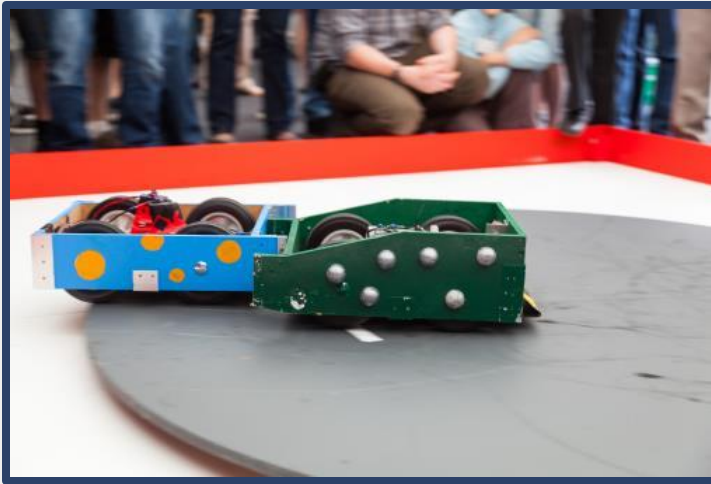

- Scoring a goal
- Moving a barrel
- Going though a door
- Traveling over a ramp
- A lot of skill!

Sumo

Two chariots compete head to head to try push the other chariot out of the ring.

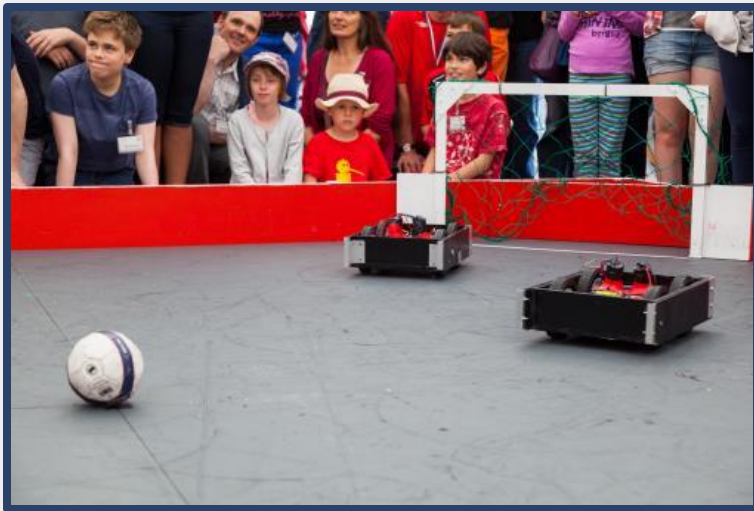

It is the best of three and the winner will go through to the next round.

Football

2-a-side game that lasts 5 minutes.

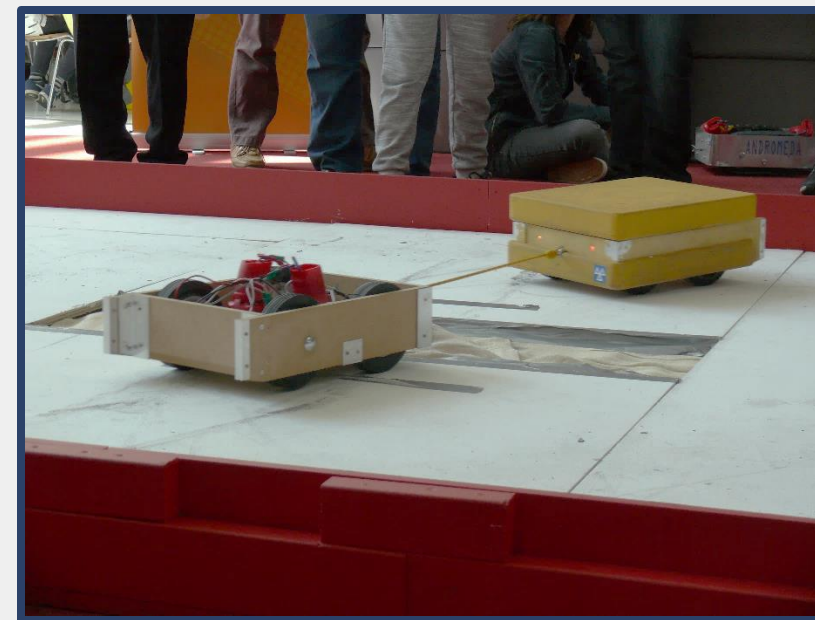

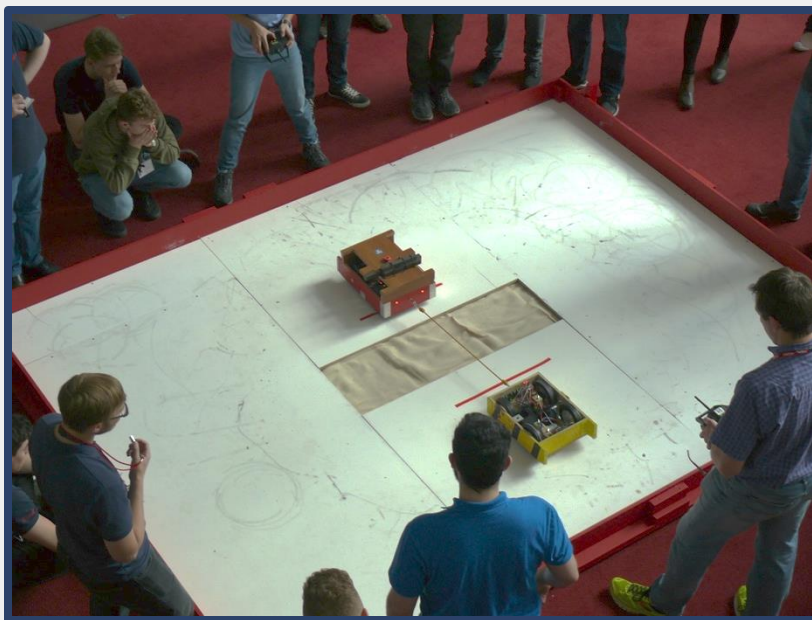

The chariots to score the most goals will go through to the next round.

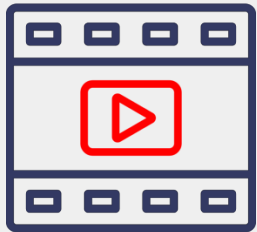

Tug of War

Two chariots compete head to head to try pull the other chariot over the line.

It is the best of three and the winner will go through to the next round.
